the intercourse between China and America
is to acquire that importance which is confidently expected."

A cordial consideration of the subject has
satisfied me of the correctness of the views satisfied me of the correctness of the views expressed by my predecessor in that report. That the steamships of the main line between San Francisco, Japan, and China should not be required to touch at the Sandwich Islands does not, in my judgment, admit of reasonable doubt, but the conditions upon which such release should be granted is a question exclusively for the determination of Congress. A wise and liberal policy toward a national enterprise of this magnitude would seem to justify the release without imposing onerous conditions, in consideration of the increased expenses incurred in building ships for the service of great size and augmented as peed, as well as of the important public interests involved in the success of the line.

A MEDAL FOR GEN. THOMAS.—It will be remembered that in December, 1865, the Tennessee Legislature voted to that gallant soldier, General GEORGE H. THOMAS, a gold medal, for his eminent services to his country. This medal has been prepared, and is New York, to make the China mail service, ammorated that service, a copy of which is annexed. The high reputation of the service, and the zeal and energy which they have manifested in making preparations for the service, afford a guarantee of the success of this great national enterprise to extend and develop American commerce, by obtaining control of the vast and constantly increasing trade of Japan and China, which is the cavantages of our geographical position should enable us to possess.
